Abstract: The infinite drifting molecule which is a portion of the universe is the reason to happen enormous collusion where each molecule has diverse mass and dimensional gravity contrasts to each molecule that helps to collide and isolate itself, that makes a difference to start unused particles and soil being with distinctive measurement conjointly. when they isolated for additional collusion between them additionally, for the collisional mass they partitioned by the shape of lights and goes back to the past organize of molecules and travel as light all through the universe as a single substance and vitality.

Keywords: Molecular Light, Light Speed, Quantum, Gravity,

1. INTRODUCTION

The universe is made of an imperceptible light molecule. within the starting, there was light particles which was voyaging with light speed around the universe where our universe is made of the light molecules from their collusion activity. When the light molecule loses its speed of light, they lose their all vibrating speed and collide with another molecule with a fragmentary grinding making unused dynamic molecule vibration and separate the ancient specific molecule bond and spread through light.

Description

In this way of unbounded machination and the unbounded enormous impact, the universe produces an interminable widespread molecule called gas, fluid, metal, and other substances losing them possessing light speed and colliding with each other making modern mass vibration

and altered speed of vibration having a distinctive arrangement with the universe. When the molecule loses its spread of light, they ended up obvious alongside other coherent molecule colliding with each other making unused substance as gas, fluid, atomic substance. When all the atomic substance collides, they make distinctive dynamic particles which make the unmistakable huge substance. Most of them at that point collide with each other or contact each other and makes light warm modern substance. When the substances' speed and mass are crossing by and large light mass of the past mass of creation, they collide with other mass substances and creates light once more.

3. PROCESSING METHOD:

It is an unbounded preparation of the universe like an enormous collusion, where the enormous blast is the machination of such molecule and will conclusion through another dark entity makings of an unused universe like a pulse. It is like the pulsing of the universe. After the enormous blast collusion of all light materials concurring to their mass and speed they collide and spread through other lights making them warm, mass, and tidy. All the all-inclusive materials have machination point from where they produce diverse materialistic substance call planet particle alongside them possess colliding point making unused subjective speed, quantum gravity, disciple planet, and collaboration remains the same until all the substance around the materials doesn't lose their all significant control energy and changed over to light once more making dark entity.

All the materials of the universe and all their successful source of control call mass, gravity, time measurement, and other substance-related to each other begin to shape a solitary point and closses in a particular point which alludes to conjunction or unbounded 0. It moreover same like big bang blast point where all lights collided and isolated with diverse measurement of energy and they made a conjunction of their possess in their colliding point moreover will decrease in that conjunction making dark entity changing over into the light

Mathematical Equation of AK Universal infinite Theorum

There's no entity in this universe since it is made of light which we can call light molecule which is unbounded and they are the reason behind dark entity and white entity where dark entity alludes to going back to the conjunction point of collution with each other and making light and mass. In the case of white entity, it alludes to the conjunction that collides all the lights to make unused considerable molecule like soil, gas, substances in conjunction with diverse measurement colliding each molecule. When white entity ended up dark entity, they not as it were colliding all particles, they moreover isolated all the dimensional together to create more mass and speed to donate the atoms to change over into lights.

$$\infty$$
+.....+ $1/\infty$ + 0 + $(-1/\infty)$ +....+(- ∞) = 0

International Journal of Information technology and Computer Engineering ISSN: 2455-5290 Vol: 02, No. 01, Dec 2021-Jan 2022 http://journal.hmjournals.com/index.php/IJITC DOI: https://doi.org/10.55529/ijitc.21.5.7

So, the widespread light things are restricted unbounded molecules which is unequivocal to where they travel through the speed of light, they don't have greater mass where they have quantum gravity. In the case of short boundless materials, it rerefers to collisional things where we allude them dark entity and they lose each mass, quantum gravity sometimes recently attending to collide in conjunction.

5. CONCLUSION

So, the mass, gravity, time which is the substance of conspiracy to create modern plants or soil where we can call them considerable components of soil from white entity or light to preserve or to adjust the central conjunction and all the universe is moving. All the materials of this universe are the same and non-fractional and they were light materials and, within the conclusion, they will be lights once more. They will collide once more and produces unused light, vibration, atoms, substance, gas, matter, planet.
